

ESET NOD32 Antivirus 4 Business Edition + ESET Remote Administrator

The latest generation of ESET's solutions for the business client

ESET NOD32® Antivirus provides proactive protection against increasingly sophisticated and targeted cyber threats. Known for being fast and unobtrusive, it allows you to focus on your business, not your antivirus.

ESET NOD32 Antivirus uses advanced heuristics that provide the best proactive detection against today's ever changing threats, before other software is able to detect them. But don't take our word for it. ESET has consistently received the highest marks in proactive protection tests conducted by av-comparatives.org, and received the highest ranking on Forbes list of best-in - class antivirus products.

Endpoint security management made easy

Ease of management is as critical as the effectiveness of your endpoint security solution. ESET Remote Administrator provides a comprehensive management console so you can control your entire network from one place – whether you support ten computers or thousands. ESET Remote Administrator has a small footprint and is highly scalable. It makes managing our security solutions simple for businesses of all sizes.

KEY FEATURES

Smart detection	ESET NOD32 Antivirus uses proactive detection technology to identify malware, providing your system with around the clock protection.
Proactive detection	NOD32 Antivirus relies on advanced heuristics as well as generic and genetic algorithms to detect new malware and new mutations of known malware.
Extremely light system footprint	ESET NOD32 Antivirus is so light your users will not even notice it's running.
Advanced archive scanning	Threats don't always enter where you expect. ESET NOD32 Antivirus can scan layers of compressed files to ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.
Encrypted communication control	Scanning SSL-encrypted HTTP and POP protocols defeats even threats that hide from plain sight.
Enhanced portable computer support	Enhanced settings for portable computers allows tasks to be postponed when the computer is running on battery power.
ESET SysRescue	Creates rescue CDs, DVDs or USB drives for cleaning unstable, infected systems.
ESET SysInspector	Integration Administrators will love our advanced diagnostic tool for taking "deepdive" snapshots of systems. Files and processes are colour coded in scan logs to make it easy for IT administrators to identify potential threats in the system.
Uninstall password protection	Password protection prevents ESET NOD32 Antivirus from being uninstalled by unauthorised employees or visitors.
ESET self defence and HIPS	ESET NOD32 Antivirus has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorised attempts to modify your OS or applications are actively blocked through a combination of advanced behavioural analysis and network filtering that monitor your system processes, files and registry keys.
Removable media access control	ESET NOD32 Antivirus has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorised attempts to modify your OS or applications are actively blocked through a combination of advanced behavioural analysis and network filtering that monitor your system processes, files and registry keys.
Removable media access control	Protects against infections from USB drives, floppies, CDs and DVDs.
Improved cleaning	Cleaning of certain difficult to remove infections has been significantly improved.
Support for Cisco Network Admission control	Regulatory compliance is simplified with native support for Cisco NAC.
Mirror updating	Mirror servers make it easy to manage distribution of signature database updates to all ESET products within the network, saving you valuable time and bandwidth.

ESET NOD32 Antivirus 4 Business Edition + ESET Remote Administrator

KEY FEATURES - ESET Remote Administrator

Multiple database support	Native support for Oracle, MS-SQL Server, MySQL and Microsoft Access allows increasingly large deployments and runs significantly faster.
Policy management	Define and enforce policies consistently throughout your network. Policy Manager makes it easy to apply, inherit and merge policies in a variety of ways. Time-saving replication policies allow multiple ESET Remote Administrator servers to synchronise efficiently in wide area network deployments.
Notification management	Notifications are highly customisable and allow for monitoring of a broad range of incidents and status of clients, possible virus outbreak or network attack, new client event, finished task, license expiration or server errors and warnings. Notification actions include email, SNMP Trap, launch on server and log entry.
License management	Easily manage multiple licenses with different terms. Even merge licenses of different customers through a special license key. License Manager makes monitoring unused clients and pending license expiration from one console a snap.
Read only access	Now it is easy to delegate or share management responsibilities of large deployments without risk of multiple administrators overwriting critical configurations.
Active directory synchronisation	Eliminate the time-intensive and error-prone task of creating groups by importing organisational structures directly from Active Directory.

SYSTEM REQUIREMENTS

ESET NOD32 Antivirus 4 – Business Edition

Processors supported	Intel or AMD x86 - x64
Operating systems	Microsoft Windows 7, Microsoft Windows Vista, Microsoft Windows XP, Microsoft Windows 2000, Microsoft Windows Server 2008, Windows Server 2003, Microsoft Windows Server 2000
Memory	44 MB
Disk space	28 MB (download) / 35MB (installation)

ESET Remote Administrator Console

Operating systems	Microsoft Windows 7, Windows Vista, Microsoft Windows XP, Microsoft Windows 2000, Windows Server 2008, Microsoft Windows Server 2003
Internet explorer	Minimum 4.0 recommended 5.5. Some reports may not display correctly in version 4.0

ESET Remote Administrator Server

Operating systems	Operating systems: Microsoft Windows NT4 SP6*, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2003, Microsoft windows 2008 Windows NT4 - Access Components (MDAC) 2.5 Service Pack 3 must be installed
Example requirements	ESET Remote Administrator has minimal system requirements. For example, ESET Remote Administrator Server installed on a Microsoft Windows Server 2003 administering 500 clients only requires: 1GHz Processor, 1 GB RAM, 2 GB free disk space, 100 Mbps Network Adapter

*NOTE: Available with version 4.2 or later. Features not supported in NT are self-defence, removable media access control, SysInspector, SysRescue and enhanced portable PC support
