

# ESET NOD32 Antivirus for Windows File Server

Protection of files in the LAN is definitely one of the priorities for a successful IT company.

NOD32 Antivirus for Windows File Server is based on high performance of NOD32 kernel. The highest scanning speed together with the highest detection rate is perfectly enhanced with the smallest footprint.

Latest generation of ESET NOD32 Antivirus system includes advanced heuristic ThreatSense® analysis with its unique ability to detect even unknown threats. If you expect stability, fast and effective detection, ESET NOD32 Antivirus for Windows File Server is the ideal solution for you.

## KEY BENEFITS

<b>Easy on the system</b>	Engineered to be light, ESET NOD32 Antivirus for Windows File Server consumes only a fraction of the system resources. It works smoothly and quietly in the background, letting the server effectively allocate system resources to vital tasks.
<b>Latest Threatsense technology</b>	ESET NOD32 Antivirus for Windows File Server brings the award winning ThreatSense® technology to deliver industry leading protection of your server. It eliminates malicious code by analysing its behaviour and preventing its execution.
<b>Time tested performance</b>	Rely on the established track record of performance and reliability of ESET NOD32 Antivirus, the industry leader in the overall number of VB awards, having received its first one in 1998. The prestigious AV Comparatives tests regularly rank ESET solutions in the Advanced+ category for overall performance and detection capabilities, with low false positives.

## KEY FEATURES

<b>Broad fine tuning options</b>	A scan can be customised to suit the needs of the organisation, reducing the impact on system resources to streamline the server workflow. Scanning behaviour options allow for defining exceptions based on suffixes, files, as well as address books.
<b>ESET's mirror functionality</b>	Enables the system administrator to configure an internal update server, reducing even further the network's exposure to threats and conserving valuable bandwidth.
<b>Automatic exclusions</b>	Automatically deletes and excludes critical server files for smooth operation.
<b>System diagnostics</b>	ESET SysInspector and ESET SysRescue simplify diagnosis and cleaning of infected systems. Execute deep scans of system processes to find hidden threats, and create bootable rescue CD/DVD or USB drives to help you repair the infected computer.
<b>Cisco NAC Support</b>	Full support of Cisco Network Admission Control (NAC)
<b>Remote administration</b>	ESET Remote Administrator makes network administration easy, oversee the entire network from one single console.

## SYSTEM REQUIREMENTS

<b>Processor</b>	Intel or AMD x86/x64
<b>Operating Systems</b>	Microsoft Windows 7, Vista, XP, 2000 (32 & 64 bit) Microsoft Windows Server 2008, 2003, 2000 (32 & 64 bit)
<b>Operating memory</b>	44 MB
<b>Disk Space</b>	35MB for installation plus additional disk space for temporary files.
